COOLBERRY 2: INNOVATIONS FOR IN-FIELD COOLING OF SOFT FRUIT

- We hope Coolberry will enable growers to rapidly remove the field-heat from produce immediately after harvest to below 5°C
- Removal of field heat from perishable produce is critical for quality and shelf life
- The intention is that the development of the Cooling Rig will help maintain optimum fruit quality, increase shelf-life and reduce losses in the supply chain

COOLBERRY - OVERVIEW

ANNUAL TURNOVER
OF £30M AND
SIX UK OFFICES

JD COOLING - BACKGROUND

THE INNOVATE JOURNEY SO FAR.....

- Continue work on the project to enable us to bring to the UK market
- Generate work within the UK and assist with continuity of jobs in the supply chain and the JD Group
- Export to Europe and then worldwide
- Further development to ensure Coolberry is a sustainable, environmentally sound solution to support the UK's bid to achieve net zero
- Looking towards further grant opportunities as this has shown us the positive impact Innovate UK have had on our business

THE FUTURE.....
